Learning from Earthquakes

Learning from Earthquakes

Recognizing the importance of rapid reconnaissance after earthquakes, in 1973, EERI initiated the LFE (Learning From Earthquakes) Program.

LFE sends multidisciplinary teams (e.g., earth scientists, engineers, social scientists) after earthquakes to learn from effects observed in the field.

NEW YORK – NORTHEAST CHAPTER

Role

The purpose of the NYNE Chapter is *reduce earthquake risk* in the Northeast US by creating an interdisciplinary organization in which *relationships are built and information is shared*, by advancing the science and practice of earthquake engineering in the northeast, by *improving understanding of the impact of earthquakes* on the physical, social, economic, political and cultural environment and by *advocating comprehensive and realistic measures for reducing the harmful effects of earthquakes*.
